CONSUMER PURCHASING BEHAVIOR

1 OPTIONAL STEP

Consumers often view sealers as an optional "extra step".

2 CHEAP ALTERNATIVES

Price sensitivity leads them to either skip the step entirely or opt for cheap, counterfeit alternatives.

3 LACK OF ADVICE

Lack of expert opinion and knowledge leads to consumers making sudden irrational choices.

CONSEQUENCES OF SKIPPING

4 PREMATURE PEELING

Skipping the sealer or using poor-quality substitutes causes the paint job to fail prematurely.

5 MOISTURE DAMAGE

Moisture from within the walls can easily penetrate and disrupt the color.

6 REDUCED LONGEVITY

The longevity of color is reduced as the paint can’t hold on to porous surface properly.
