Dutch Agrosil: The Guarantee of Unbreakable Trust

A silicon-based, 100% poison-free, 3-in-1 crop protection solution - proven across 150+ field trials on Bangladeshi soil - positioned to transform farmer trust and rebuild agricultural productivity across Bangladesh.

SQ AGRICULTURE LTD.
Cultivating Farmers Dream

Agriculture at a Crossroads: The Market Failure We're Solving

Bangladesh's agricultural sector - **11-13% of GDP**, 40% of the workforce - faces a compounding crisis: decades of chemical dependency, declining soil fertility, and a market flooded with counterfeit products that have destroyed farmer trust in innovation.

- **GDP & Workforce**

Agriculture contributes 11–13% of Bangladesh's GDP and employs 40% of the national workforce (World Bank / ILO 2025).

- **Chemical Dependency**

Decades of repeated chemical pesticide use have caused rising input costs, declining soil fertility, and falling yields a self-reinforcing trap.

- **Policy Tailwind**

Sustainable agriculture initiatives target a 20–50% reduction in chemical pesticide use nationally a direct regulatory opening for Dutch Agrosil.

- **Trust Collapse**

Market flooded with fake/imitation pesticides, eroding farmer trust in any unfamiliar product including legitimate innovation.

- **Core market failure:** Not a lack of better products a lack of trustworthy discovery mechanisms. Dutch Agrosil enters as a silicon-based, poison-free, preventive alternative backed by 150+ field trials over 3 years on Bangladeshi soil.

Cultivating Farmers Dream

Five Layers of Pain - One Farmer, One Season

88% of Bangladeshi farm holdings are under 2.5 acres (BBS Agricultural Census, cited by World Bank). The overwhelming majority operate hand-to-mouth - a bad harvest threatens subsistence, not just profit. Every purchasing decision carries existential weight.

The Trust & Cognitive Barrier

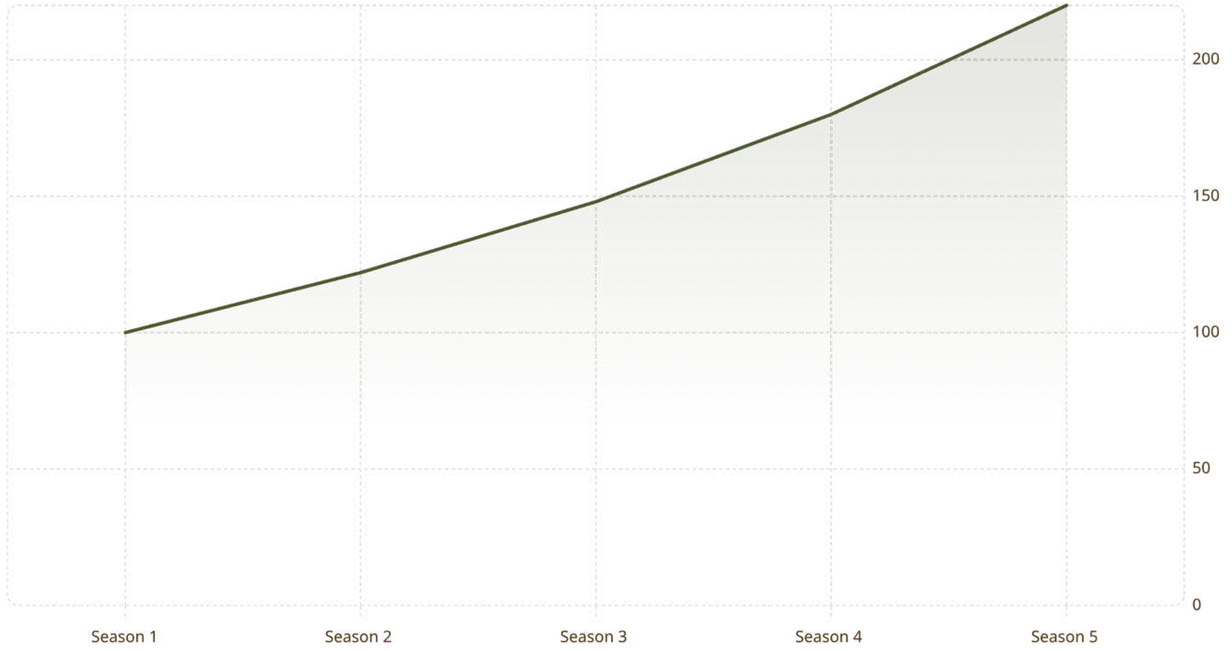

Previously burned by fake and toxic products, farmers carry blanket suspicion toward any new offering. "Prevent before damage" is an unfamiliar mental model in a market trained to spray reactively.

- Blanket suspicion of unfamiliar brands
- "Prevent before damage" is an unfamiliar mental model
- Reactive spraying is the deeply ingrained norm
- Hidden compounding cost of conventional chemicals

The Financial Reality

Zero margin for a failed experiment. Farmers spend more each season on inputs while yields decline - a compounding trap with no ceiling.

- Hand-to-mouth economics on under 2.5 acres
- Rising input costs year-over-year
- Falling yields despite higher spending
- Conventional pesticides create invisible long-term cost curve

Conventional pesticides appear cheaper upfront but create a rising, uncapped cost curve as soil degrades and resistance builds. Dutch Agrosil's higher initial investment flattens over time - a structural economic advantage, not just an agronomic one.

Three Segments, One Unified Strategy

Dutch Agrosil's go-to-market strategy is calibrated to the risk profile, decision-making speed, and influence potential of three distinct farmer segments - each playing a specific role in the trust-building flywheel.

Segment 1: Smallholder & Subsistence Farmers

88% of all farm holdings. Price-sensitive, risk-averse, require visible proof before spending. The primary volume opportunity - and the hardest to convert without institutional credibility and peer demonstration.

Segment 2: Commercial & Large Growers

ROI-driven, data-literate, faster to convert. Serve as high-visibility showcase demo sites. Their adoption signals legitimacy to the smallholder majority and accelerates word-of-mouth diffusion across villages.

Segment 3: Urban & Peri-Urban Growers

Nurseries, parks, rooftop gardens. Low risk-aversion, high social visibility. Generate a brand credibility halo that radiates outward - particularly effective for digital content and media storytelling.

THE BIG IDEA

অটুট বিশ্বাসের গ্যারান্টি - ডাচ এগ্রোসিল

The Guarantee of Unbreakable Trust Dutch Agrosil

Supporting proof line: ১৫০+ মাঠ পরীক্ষায় প্রমাণিত - বিষ নয়, বিশ্বাস

Proven across 150+ field trials - Not poison, trust

Strategic Rationale

Reframes the brand promise from product features to an emotional guarantee paired with hard evidence. In a market where trust is the scarcest commodity, Dutch Agrosil leads with proof - not promises.

Brand Equity Mechanism

Positions Dutch Agrosil alongside trust-led Bangladeshi brand icons - the same equity mechanism as brands built on ভরসা (trust). The guarantee is the product; the product is the guarantee.

The Closing Thread

One small trial today becomes unbreakable trust and a protected harvest every season after. The first purchase is the hardest - every subsequent season is a reinforcement of the original promise kept.

TRUST LADDER

A Step-by-Step Journey from Skepticism to Loyalty

Eastern Bank PLC.

STEP 1

SEE

Farmers witness real field performance before making any purchase decision.

STEP 2

BELIEVE

Trusted local farmers share firsthand results with their community.

STEP 3

TRY

Affordable 50ml & 100ml packs encourage first-time adoption.

STEP 4

TRUST

Genuine products, expert guidance, and financing through SQ's existing dealer network.

STEP 5

ADVOCATE

Satisfied farmers become the brand's most powerful ambassadors.

Credibility Layer: Making the Brand Feel Known Before Contact

- **ATL Strategy: Television & Radio**

TV and radio spots built around **real farmer storytelling** - before/after transformation narratives that mirror the demo plot journey. Rural Bangladesh trusts and watches television more than social platforms, making ATL the right tool for **broad legitimacy**, not direct conversion.

Purpose: Make Dutch Agrosil feel familiar and credible BEFORE any dealer or village ambassador makes first contact. Pre-sold trust reduces friction at the point of trial.

- Real farmer faces, real harvest results - not actors
- Before/after narrative arc mirrors the Trust Ladder
- Radio extends reach to lowest-connectivity upazilas
- ATL builds brand recognition; BTL converts it

Why ATL First?

In a market where counterfeit products have destroyed trust, farmers need to feel they've "heard of" a brand before they'll engage with a dealer. ATL creates that pre-awareness - the psychological permission to listen.

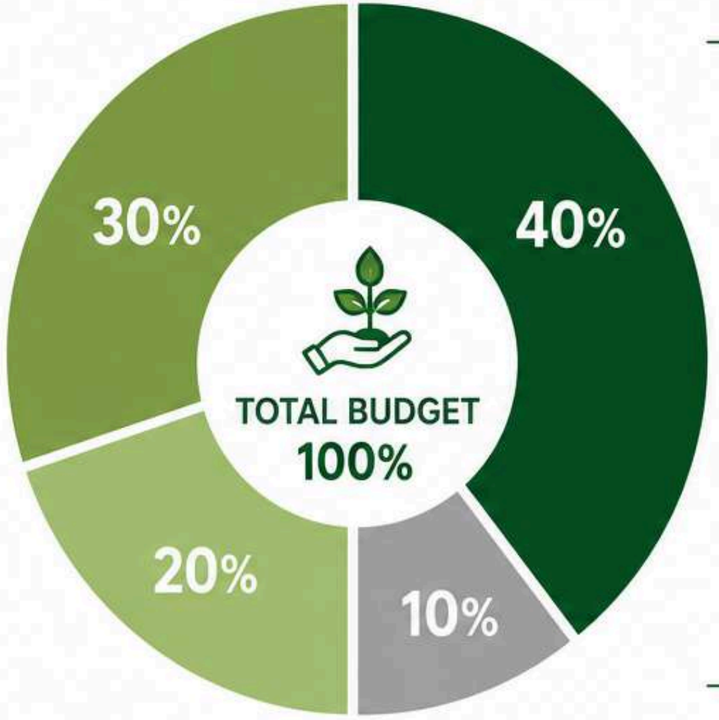

Channel Rationale

Television remains the most trusted mass medium in rural Bangladesh. Social platforms are growing but lack the institutional credibility that TV confers - especially among older, decision-making farmers.

MARKETING INVESTMENT STRATEGY

Investing in Trust

Our budget is allocated to build trust at every stage of the farmer journey – from awareness to advocacy.

Every Taka Invested, Builds Lasting Trust.

40% BTL
Human Interaction
Build trust through on-ground engagement, demos, and community connection.

30% ATL
Mass Credibility
Create awareness and credibility through TV, radio, and print campaigns.

20% Digital
Scale Proof
Amplify real stories, reviews, and updates through digital platforms.

10% Research & Optimization
Measure & Improve
Track performance, gather insights, and optimize for maximum impact.

We invest where it matters most – **building trust that lasts.**

PROMOTIONAL STRATEGY

Integrated BTL + Digital for Maximum Trust Impact

We combine human connection on the ground with digital proof to build awareness, trust, and advocacy.

BTL – HUMAN CONNECTION BUILDS TRUST

Dealer Engagement
Train & empower our dealer network to educate and build relationships.

Farmer Workshops
Small group sessions in villages to demonstrate and educate.

Lead Farmer Ambassadors
Partner with respected farmers to influence their communities.

Trial Pack Distribution
50ml & 100ml packs to lower first-time adoption risk.

BUILD TRUST.
DRIVE GROWTH.

DIGITAL – PROOF THAT SCALES

Facebook Campaigns
Targeted content showing results, tips, and farmer stories.

QR Trust Proof
Scan on pack to see demo results, testimonials, and authenticity.

Farmer Testimonials
Real stories from real farmers – shared as short videos.

Reels & Short Videos
Engaging, shareable content in local language.

CERTIFIED DEALER NETWORK

Ensures genuine products, expert guidance & after-sales support.

QR TRUST PROOF

Transparency at every step – farmers see the proof, trust the product.

TRUST HARVEST FESTIVAL

Celebrate results, recognize farmers, and strengthen community trust.

SQ AGRICULTURE LTD.
Cultivating Farmers Dream

From Awareness to Advocacy – A Complete Trust Ecosystem

MAPA

Execution Roadmap & Feasibility

Why This Campaign Can Be Successfully Implemented

Eastern Bank PLC.

1 CAMPAIGN TIMELINE

PRE-SEASON
- Dealer Training
- Awareness Campaign

GROWING SEASON
- Demo Plots
- Farmer Workshops
- Digital Content

HARVEST SEASON
- Trust Harvest Festival
- Farmer Testimonials
- Community Recognition

SCALE-UP
- Referral Marketing
- Repeat Purchase
- District Expansion

2 WHY IT IS FEASIBLE

EXISTING DEALER NETWORK
Leverage SQ Agriculture's nationwide distribution system.

EXISTING FARMER RELATIONSHIPS
Utilize current relationships with farmers and retailers.

AFFORDABLE ROLLOUT
Phased implementation minimizes financial risk.

DIGITAL SUPPORT
Facebook, QR verification and WhatsApp extend campaign reach at low cost.

3 IMPLEMENTATION ADVANTAGE

WHY THIS STRATEGY WORKS

EXISTING INFRASTRUCTURE → LOW ADDITIONAL INVESTMENT → EASY EXECUTION → HIGH SCALABILITY

SQ AGRICULTURE LTD.
Cultivating Farmers Dream

By leveraging SQ Agriculture's existing infrastructure, our strategy minimizes execution risk while maximizing long-term farmer trust.

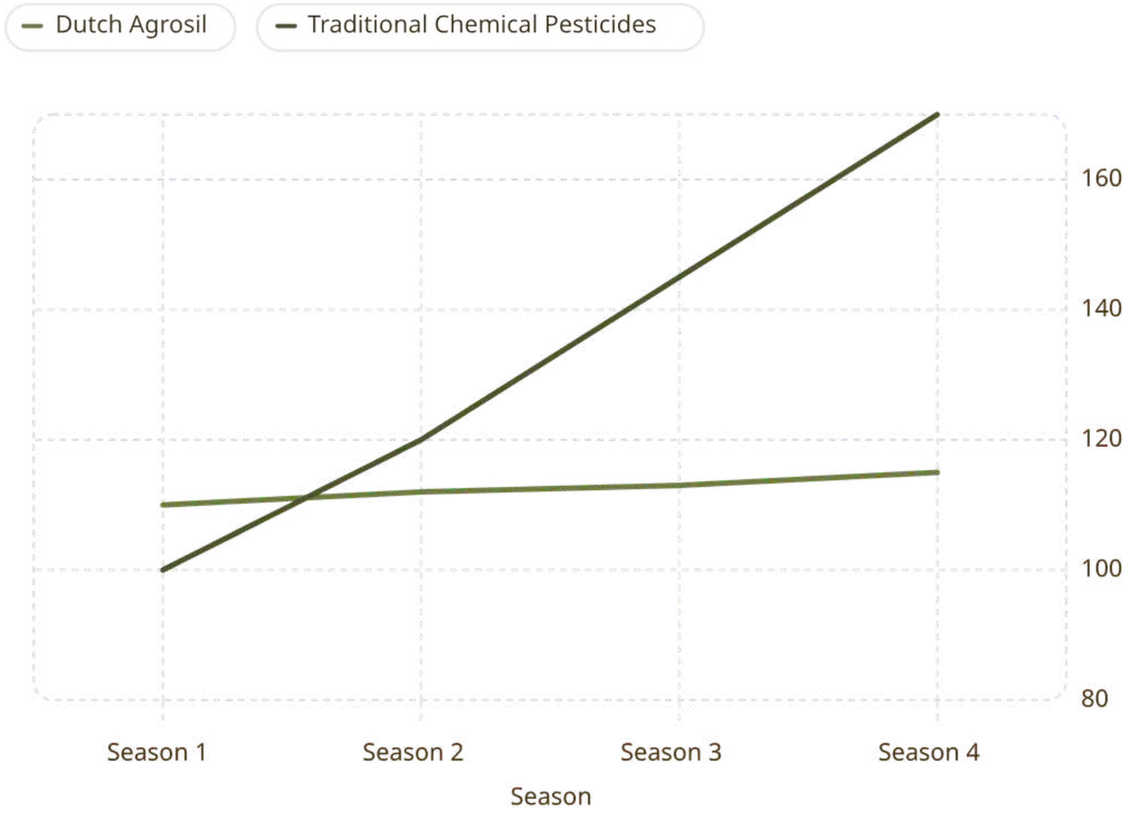

Long-Term Value Creation

Traditional Costs Rise

Soil degradation, chemical resistance, and rising input costs drive a steep cost curve.

Dutch Agrosil Stabilizes

Healthier soil and preventive protection flatten long-term costs.
